

This year, patient and physician advocate partners engaged on issues ranging from the Prescription Drug User Fee Agreement, the Inflation Reduction Act, the Federal Trade Commission's investigation into pharmacy benefit managers, intellectual property rights, Medicare coverage of novel Alzheimer's treatment, and antimicrobial resistance. Their commitment to ensuring patients have access to lifesaving treatments and medications is a priority and they work tirelessly to promote the continued development of these important innovations.

As we look to next year, patient access and affordability will continue to be a top priority for partners and Congressional leaders. We're wishing everyone a healthy and happy holiday season, and we hope to celebrate victories for patients in 2023.
